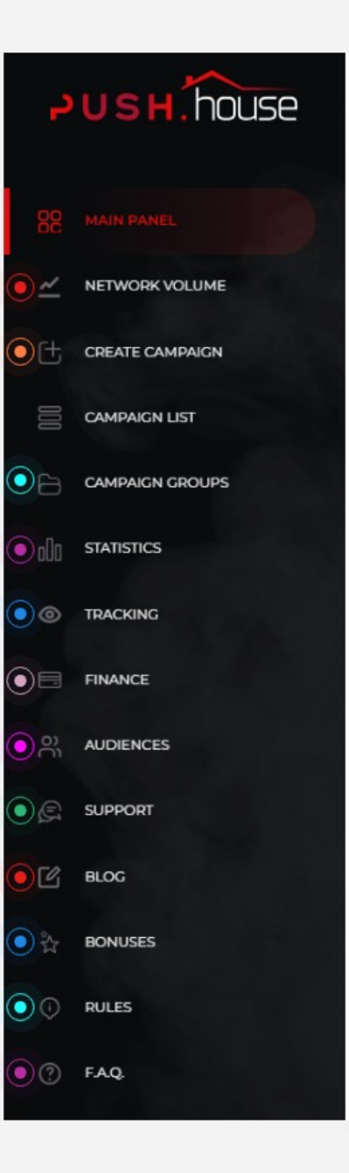
1 MENU Menu Overview



Network Volume

Available traffic volumes by GEO.

Create Campaign

Section for creating and launching new advertising campaigns.

Campaign Groups

Templates for grouping multiple campaigns into one.

Statistics

Detailed campaign statistics and micro-bidding settings.

Tracking

S2S tracking setup for accurate conversion tracking in the statistics section.

Finance

Section for depositing funds.

Audiences

Section for creating Blacklists and Whitelists, as well as setting up retargeting.

Support

Section for creating support tickets to resolve any issues.

Blog

Useful materials, guides, and case studies from our partners.

Bonuses

Promo codes for bonuses on partner services.

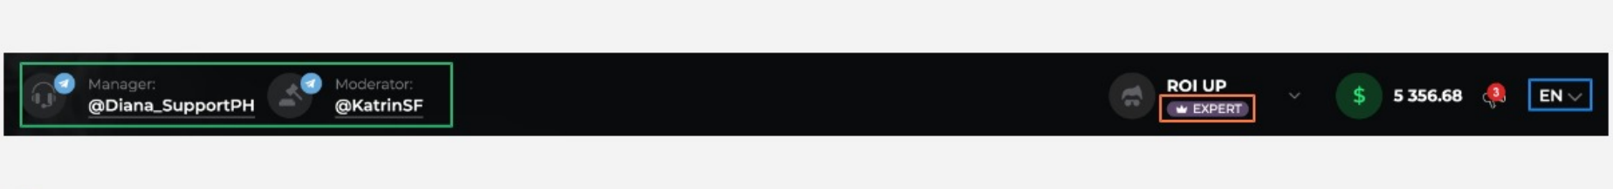
Rules

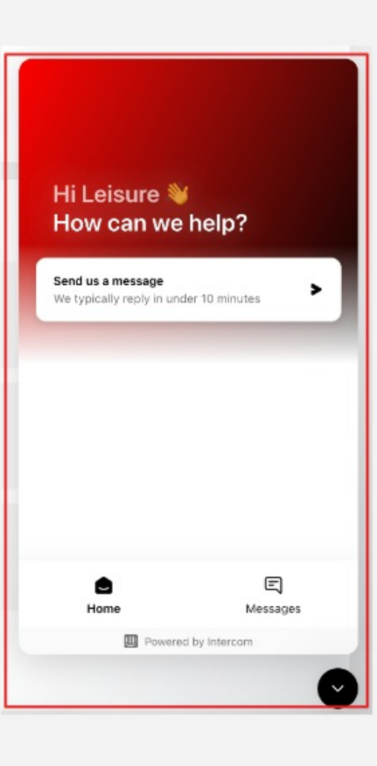
Information about the advertising network's terms of use.

FAQ

Frequently asked questions.

1 MENU Main Panel





Personal Manager

Here you can find your personal manager's contact details (Telegram) and leave feedback on their work.

Partner Levels

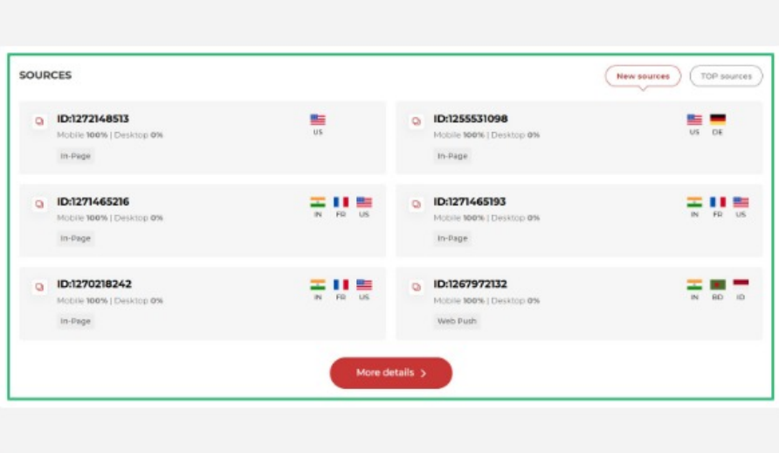
Gain special privileges based on your activity and monthly spending.

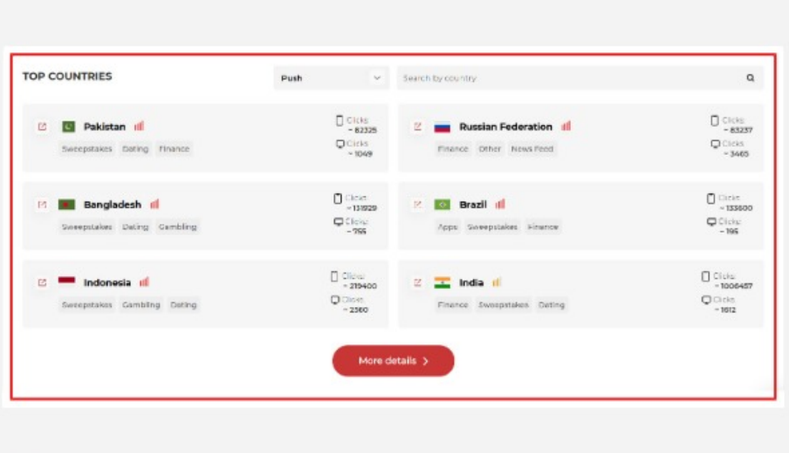
Website Language

Choose your preferred language. Currently, Push.House supports the following languages: RU, EN, UK, ES, PT.

Support

If you have any questions while setting up your campaign, our managers are happy to help.





Sources

A list of top recommended sources.

Top Countries

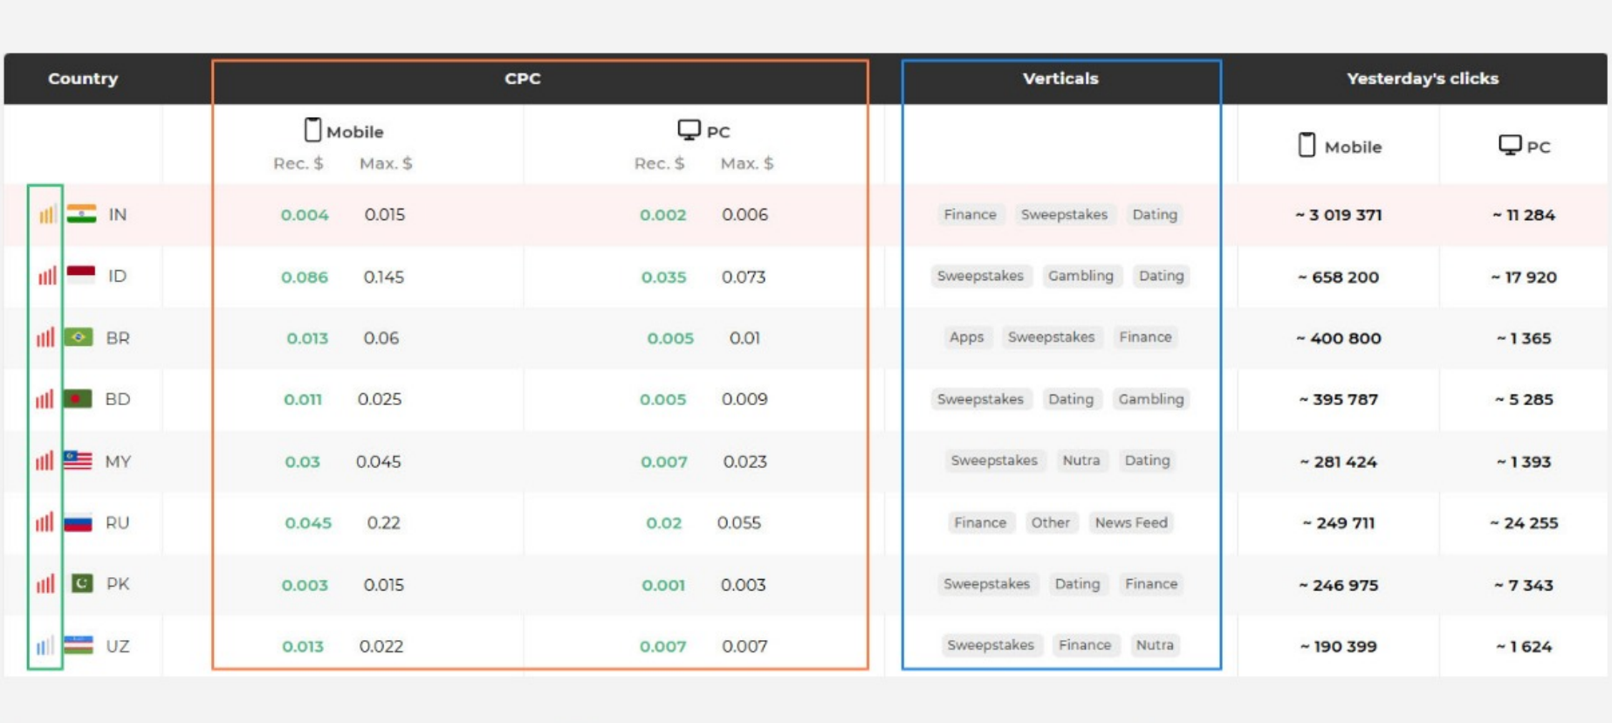
A ranking of countries with the highest available traffic volumes, along with vertical recommendations.

1 MENU Network Volume

Network Volume & Trends – Statistical data on traffic volume and bids from various devices in a specific GEO over the previous day, including feed traffic.

In the **"Network Volume"** tab, you can check how many clicks were received from your selected GEO on desktop and mobile devices. You will also find recommended and maximum bids.

This data can be used to estimate potential traffic volume and budget expenses for your chosen GEO and device. The statistics include all campaign data from the previous day and are updated daily at **00:00 UTC+3**.



Country	CPC Mobile Rec. $	CPC Mobile Max. $	CPC PC Rec. $	CPC PC Max. $	Verticals	Yesterday's clicks Mobile	Yesterday's clicks PC
IN	0.004	0.015	0.002	0.006	Finance Sweepstakes Dating	~ 3 019 371	~ 11 284
ID	0.086	0.145	0.035	0.073	Sweepstakes Gambling Dating	~ 658 200	~ 17 920
BR	0.013	0.06	0.005	0.01	Apps Sweepstakes Finance	~ 400 800	~ 1 365
BD	0.011	0.025	0.005	0.009	Sweepstakes Dating Gambling	~ 395 787	~ 5 285
MY	0.03	0.045	0.007	0.023	Sweepstakes Nutra Dating	~ 281 424	~ 1 393
RU	0.045	0.22	0.02	0.055	Finance Other News Feed	~ 249 711	~ 24 255
PK	0.003	0.015	0.001	0.003	Sweepstakes Dating Finance	~ 246 975	~ 7 343
UZ	0.013	0.022	0.007	0.007	Sweepstakes Finance Nutra	~ 190 399	~ 1 624

Level of GEO Competitiveness

A metric that shows the level of demand and competition in a specific GEO.

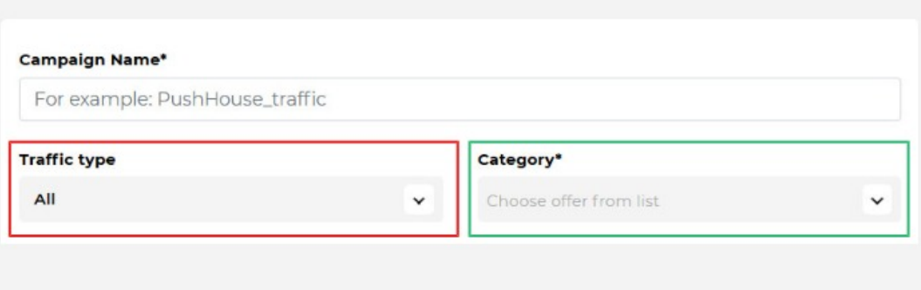
Rec. $ / Max. $

Recommended and maximum bids for the selected GEO and device.

Verticals

The top 3 verticals recommended for promotion in the selected GEO.

2 Create Campaign Traffic Type & Category



Campaign Name*

For example: PushHouse_traffic

Traffic type: All

Category*: Choose offer from list

Traffic Type

Adult traffic (for 18+ offers) and **Mainstream traffic** (for all other offers).

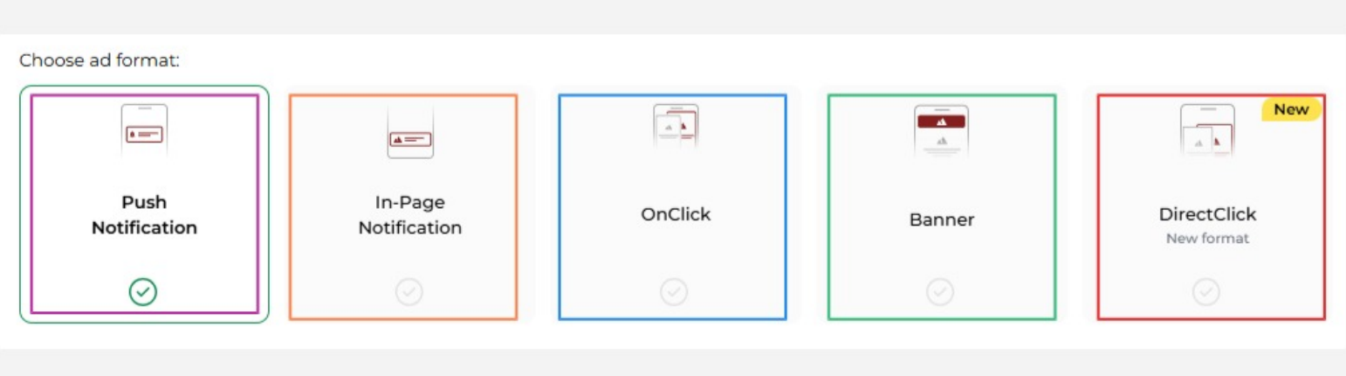
Tip:
If your offer requires a specific traffic type, select it (e.g., **Mainstream**). Otherwise, choose ALL.

Category

Select the vertical that matches your offer.

Tip:
Choosing a vertical does not affect the type of traffic.

2 Create Campaign Format (Multi-format) & Macros



Push Notifications

Small pop-up ads appearing on a user's mobile or desktop screen. They provide high-quality traffic and are delivered only after the user consents to receive notifications.

In-Page Push

Banner ads designed to look like push notifications but do not require a subscription. These ads are displayed directly on the website.

OnClick (Popunder, Clickunder или Pop-up)

Ads that open the offer's landing page in a new browser tab when a user clicks anywhere on the screen.

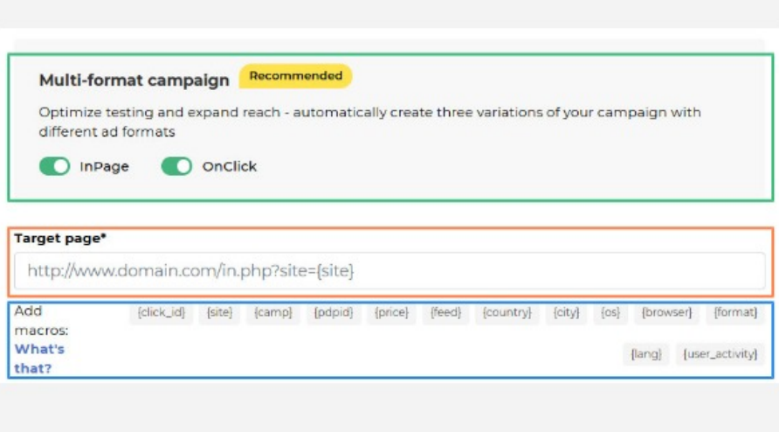
The new page opens via a special script embedded in the website code. When the user interacts with the page (e.g., clicks or scrolls), the script triggers the offer's page in a separate tab.

Banner

An ad format that consists of graphic advertising in the form of an image or animation. When a user clicks the banner, they are redirected to the offer's landing page.

DirectClick

An ad format similar to OnClick, but using more highly optimized zones and sites with high traffic.



Multi-format campaign Recommended

Optimize testing and expand reach - automatically create three variations of your campaign with different ad formats

InPage OnClick

Target page*

http://www.domain.com/in.php?site={site}

Add macros: {click_id} {site} {camp} {pdpid} {price} {feed} {country} {city} {os} {browser} {format} {lang} {user_activity}

What's that?

Macros

Special parameters that help track and analyze campaign performance based on various metrics. The tool helps improve advertising results and achieve more precise targeting of your target audience.

Macros dynamically replace values based on user interactions, allowing you to gather statistics and optimize your campaigns.

Use macros for **postback tracking** in a tracker or affiliate network.

Multi-Format Campaign

A feature that allows you to launch a campaign with multiple ad formats simultaneously.

Example: You create a **Web Push** campaign, and the system duplicates the settings for **In-Page Push** and **OnClick** campaigns. All initial settings are preserved, and the minimum CPC is set automatically based on the selected region.

Tip:
Beginners are highly recommended to start with **Push Notifications**. Later, you can scale up using **In-Page Push** and **OnClick**.

Need help? Contact your **Personal Manager** for recommendations on working with all formats.

Landing Page

Add the URL of your **landing page** or **direct link**.

2 Create Campaign Traffic Settings

Partner Traffic (Feeds)

Partner subscription bases where your ads are displayed.

Tip:
It's strongly recommended to start with **Push.house's internal subscription bases**. Feeds are typically used for scaling after campaign optimization. **Need help?** Contact your **Personal Manager** for guidance on working with feeds.

Traffic Activity

Premium — top-tier engaged audience

High — stable quality with strong volume

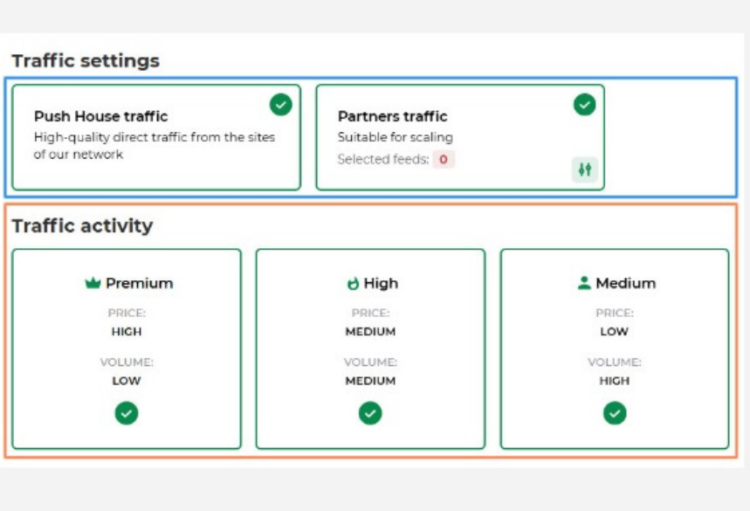
Medium — mass traffic with solid conversion potential

Low — high-volume traffic for testing and broad reach

Tip:
Due to high competition in some GEOs and verticals, it's best to launch **two campaigns**:

- **Premium Traffic Campaign** – With higher-than-recommended bids.
- **High & Medium Traffic Campaign** – With lower bids.

Why? This split allows you to secure competitive bids for fresh traffic while avoiding overpaying for less active users.



Traffic settings

Push House traffic: High-quality direct traffic from the sites of our network

Partners traffic: Suitable for scaling. Selected feeds: 0

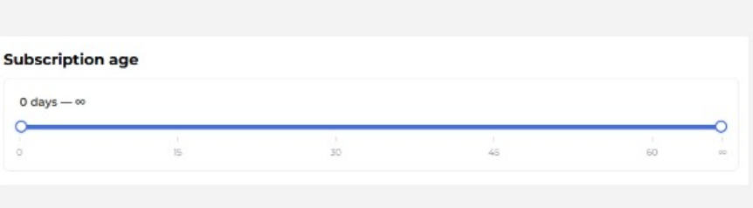
Traffic activity

Premium	High	Medium
PRICE: HIGH	PRICE: MEDIUM	PRICE: LOW
VOLUME: LOW	VOLUME: MEDIUM	VOLUME: HIGH

Subscription Age

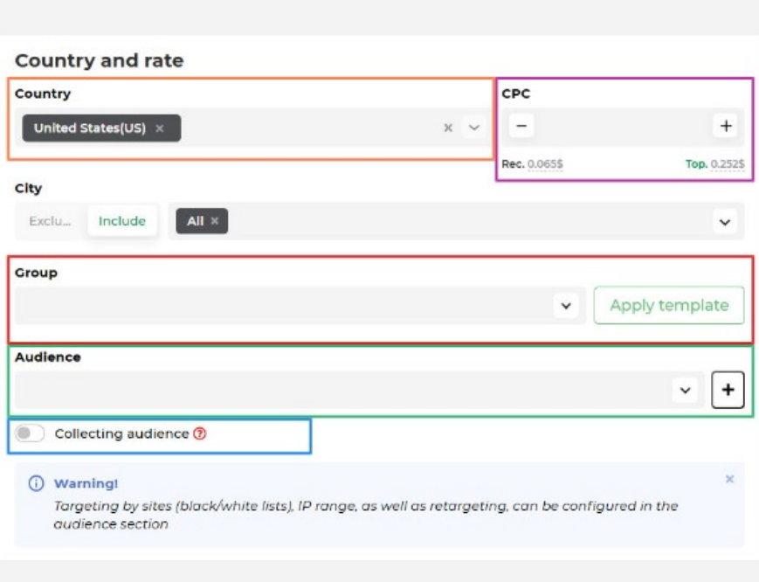
A slider ranging from 0 to 60 days, with the final step set to ∞ — lets you target subscriptions of a specific "freshness."

- **Fresh subscriptions (0–15 days)** — the most active and engaged audience with a high CTR.
- **Mid-age subscriptions** — a balance between volume and quality.
- **Entire base up to ∞** — maximum reach for broader testing.



IMPORTANT!
Subscription age targeting is available for the Push format only.

2 Create Campaign Country & Rate



Country and rate

Country: United States(US)

CPC: Rec. 0.065$ Top. 0.252$

City: Exclu... Include All

Group: Apply template

Audience

Collecting audience

Warning! Targeting by sites (black/white lists), IP range, as well as retargeting, can be configured in the audience section

Country

Add up to **30 GEOs**. A separate campaign will be created for each of them.

CPC (Cost per Click)

Recommended and maximum CPC rates, which are also available in the **Network Volume** section. You can start with the recommended CPC or choose a lower bid for testing.

CPA Goal

Automatic optimization of cost per result (conversion). The algorithm automatically adjusts bids in real time. Zones with conversions receive bid increases, while zones without results are blocked after reaching the test limit. Since the feature is in beta, delays or inaccuracies in optimization may occur, so we recommend monitoring the campaign manually.

CPM

Cost per 1000 impressions. The advertiser pays for every 1000 ad impressions. You can always start with the recommended bid or choose a lower value for more cautious testing. Since the feature is in beta, delays or inaccuracies in optimization may occur, so we recommend monitoring the campaign manually.

Group

Organize multiple campaigns into groups for easier management.

Audience

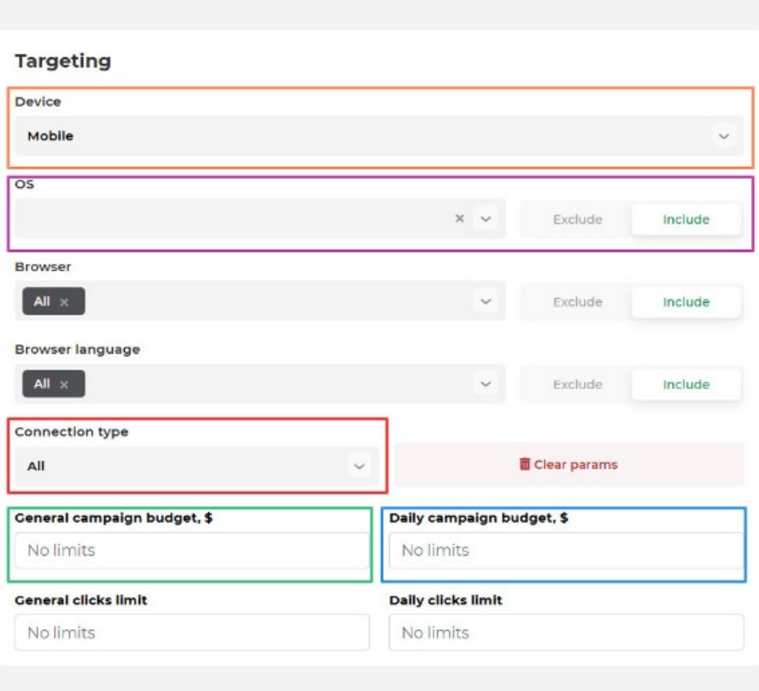
A list of **source IDs** or **IP sources** that you can **block (Blacklist) or target (Whitelist)**. Add an existing audience or create a new one.

Collecting Audience

A feature for gathering **user IDs** for future retargeting.

IMPORTANT!
Do not collect campaign user data within the same audience you are using for targeting. Create a separate audience for this purpose.

2 Create Campaign Targeting & Budget



Targeting

Device: Mobile

OS: Exclude Include

Browser: All — Exclude Include

Browser language: All — Exclude Include

Connection type: All — Clear params

General campaign budget, $: No limits

Daily campaign budget, $: No limits

General clicks limit: No limits

Daily clicks limit: No limits

Available Traffic

Once targeting is set, the system will analyze and estimate the available traffic volume based on bids over the last **24 hours.**

Device

Types of devices for targeting:

- Mobile
- Desktop

OS

Choose the operating system for targeting.

Connection Type:

- 3G/LTE
- Wi-fi

IMPORTANT!
When selecting mobile traffic, carrier targeting becomes available based on your chosen GEO.

General Campaign Budget

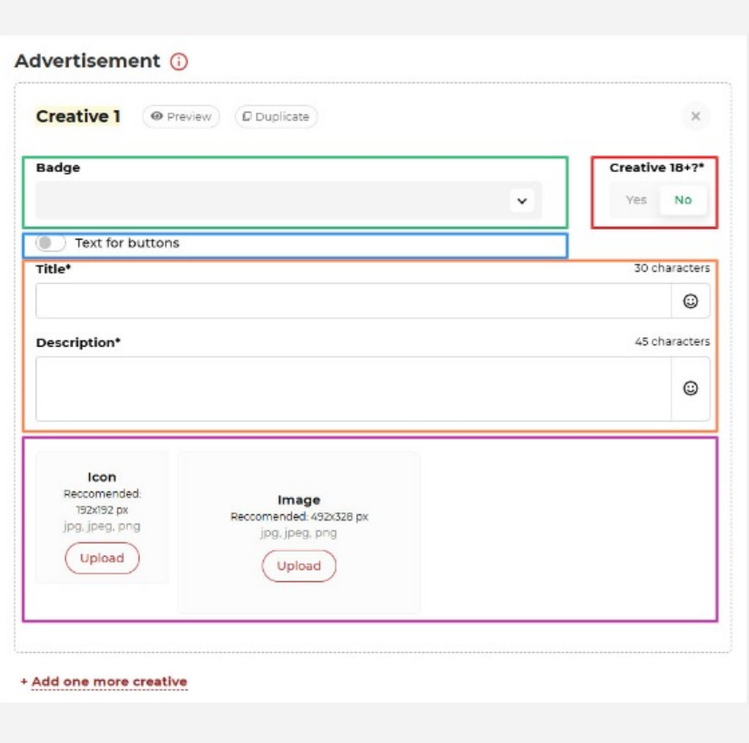
The overall spending/click limit (**minimum $10 and 1,000 clicks**).

Daily Budget

The spending/click limit per day (**minimum $10 and 1,000 clicks**).

IMPORTANT!
If you duplicate campaigns or create multiple ones, each campaign gets an individual budget, not a shared group limit.

2 Create Campaign Creative



Advertisement

Creative 1 Preview Duplicate

Badge

Creative 18+?* Yes No

Text for buttons

Title* 30 characters

Description* 45 characters

Icon Recommended: 192x192 px jpg, jpeg, png Upload

Image Reccomended: 492x328 px jpg, jpeg, png Upload

+ Add one more creative

Push Ads

Badge

An icon that is suitable for your vertical, which increases CTR and conversions.

18+ Creative

Select **Yes** if your ad contains adult or erotic content.

Text for Button

Customize the **CTA button text** to increase user motivation. If left blank, default text will be used. Clicking the button is counted as clicking the ad.

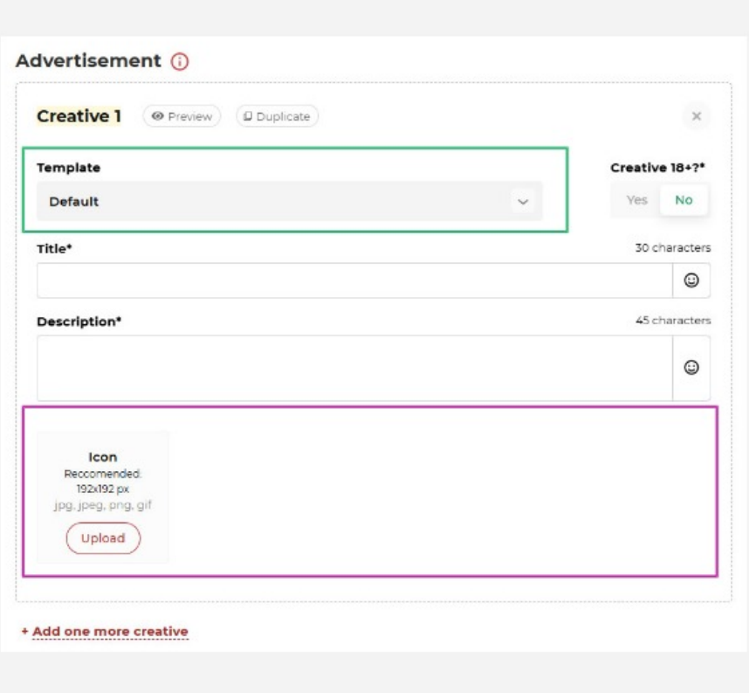
Title & Description

Use macros **{CITY} {COUNTRY}**, which automatically insert the user's city/country in their browser language.

IMPORTANT!
Macros in lowercase **will not work** (e.g., **{city}, {country}**)

Icons & Images

For creative inspiration and competitor analysis, use our **free ad monitoring service – Spy.house**.



Advertisement

Creative 1 Preview Duplicate

Template: Default

Creative 18+?* Yes No

Title* 30 characters

Description* 45 characters

Icon Reccomended: 192x192 px jpg, jpeg, png, gif Upload

+ Add one more creative

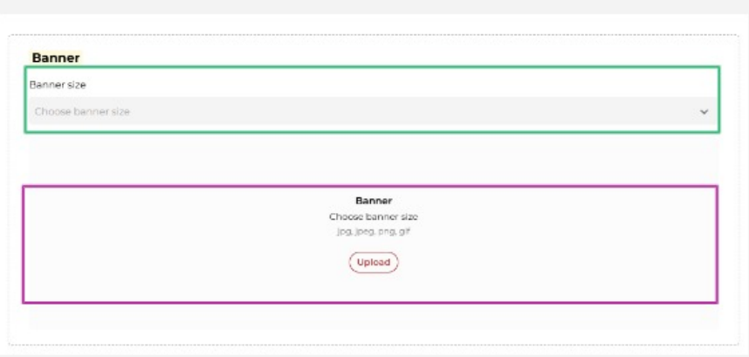
In-Page Push

Template

Customize the ad based on a specific **OS or social network**, including button colors and positioning.

Icon

In addition to standard formats, you can use **GIFs**.



Banner

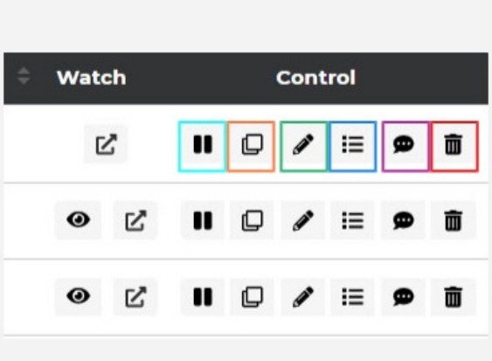
Banner Size

Here you can choose the banner size, 14 sizes: from classic desktop to mobile placements.

Banner

In addition to standard formats, you can use **GIFs**.

2 Create Campaign Moderation / Status



- **Run / Stop** the campaign.
- **Copy** the campaign.
- **Edit** the campaign.
- **Prices by Platforms** – Control bids for specific sources.
- **Comments** – leave notes about the campaign.
- **Delete** the campaign – It will be moved to the **"Deleted"** section and archived.

After creation, the campaign will be reviewed, and its status changes. **Moderation usually takes up to 3 hours.**

Statuses:

Active

The campaign is running and receiving traffic.

Stopped

The campaign is disabled (stopped manually or after moderation).

Pending

The campaign is awaiting approval.

Limit

The campaign reached its set **budget or click limit.**

No Funds

The balance is below **$5**. Please add funds to continue receiving traffic.

Rejected

The campaign was **rejected**. Check the reason, make adjustments, or contact a moderator.

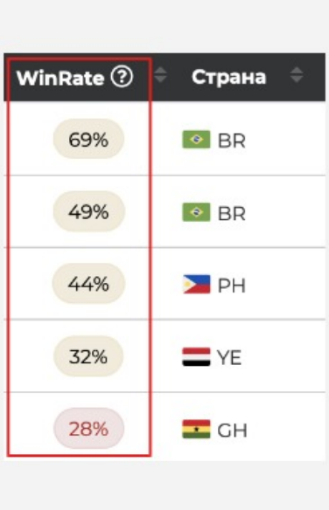
Schedule

The campaign is paused due to a **time-based restriction** (e.g., specific hours/days).

Deleted

The campaign was removed and placed in the **"Deleted"** section.

2 Create Campaign WinRate



WinRate	Страна
69%	BR
49%	BR
44%	PH
32%	YE
28%	GH

WinRate — A metric that shows how often your campaign **wins auctions** for ad impressions. **Higher WinRate = More Traffic.** The **higher** your WinRate percentage, the more successfully your campaign competes with other advertisers, leading to **higher traffic volume**.

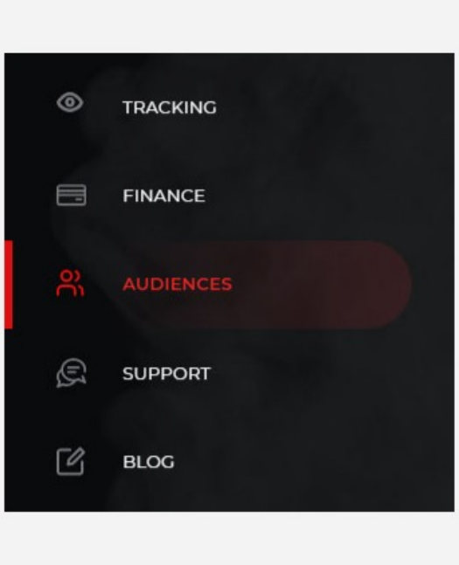
3 Audiences

Creating a Black/White List

- **White List** – A list of sources where you allow ad impressions. When you add a site to the White List, ads are shown only on those specific websites. This allows you to target the sources that are most relevant to your campaigns.
- **Black List** – A list of sources where you prohibit ad impressions. When you add a site to the Black List, you exclude any ads from being shown on that site. This helps avoid placing ads on unwanted sources and significantly saves your budget.

IMPORTANT!
To create Black/White Lists correctly, make sure all values are listed one per line without punctuation marks.

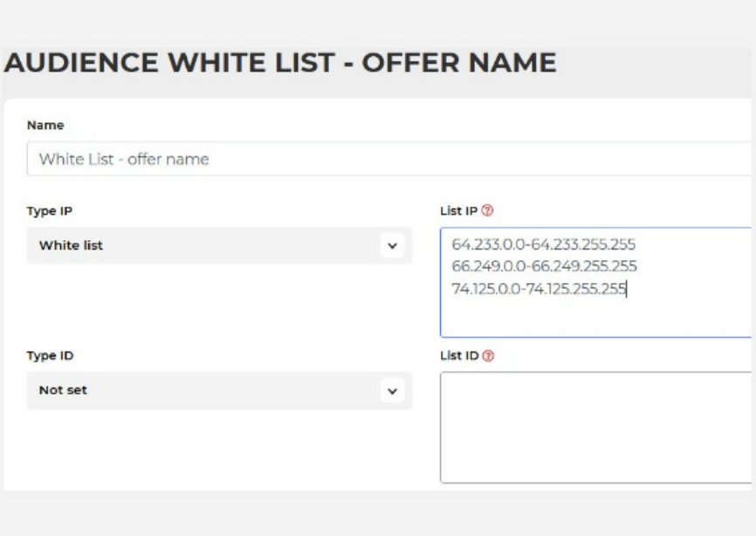
How to Create a White/Black List: Go to the **"Audiences"** section of the menu.



3 Audiences Creating a Black/White List (IP Type)

White List – Use this list if you need traffic from specific operator IP ranges or GEO regions. Here, you can specify IP ranges from operators accepted by your affiliate program, or set up getting traffic from ranges tied to specific cities not represented in our network.

AUDIENCE WHITE LIST - OFFER NAME



Name: White List - offer name

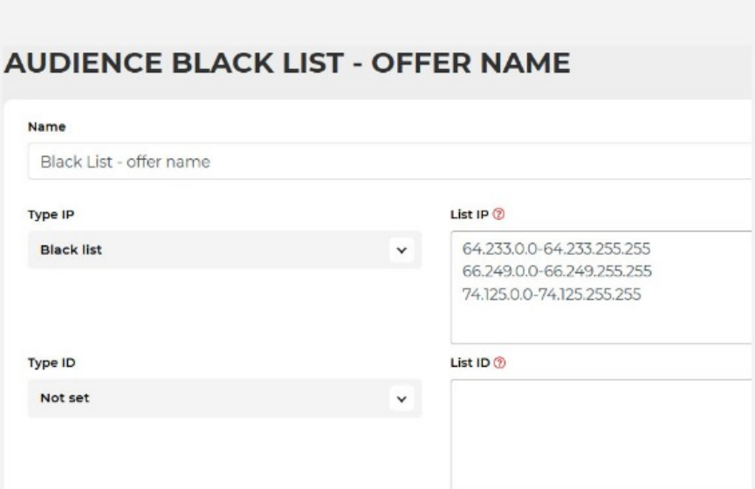
Type IP: White list

List IP:
64.233.0.0-64.233.255.255
66.249.0.0-66.249.255.255
74.125.0.0-74.125.255.255

Type ID: Not set

List ID

AUDIENCE BLACK LIST - OFFER NAME



Name: Black List - offer name

Type IP: Black list

List IP:
64.233.0.0-64.233.255.255
66.249.0.0-66.249.255.255
74.125.0.0-74.125.255.255

Type ID: Not set

List ID

Black List – Used when you need to block traffic from certain operator IP ranges or exclude specific cities not represented in our network.

IP ranges should be specified in this format:

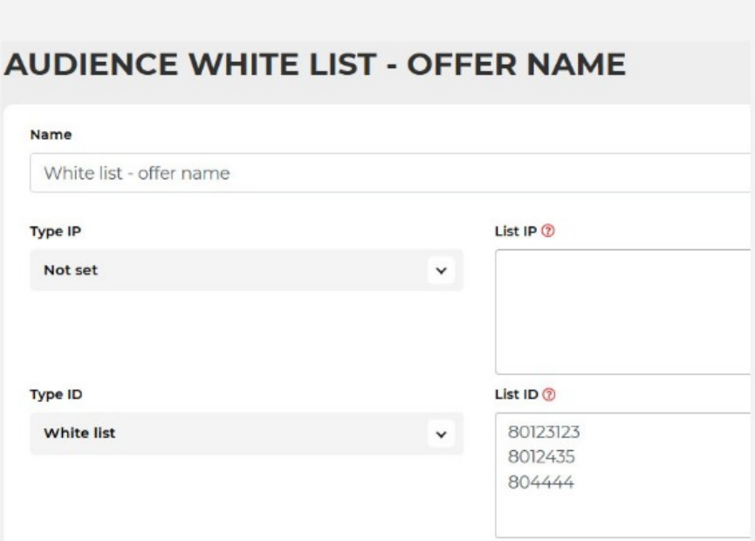
64.233.0.0-64.233.255.255
66.249.0.0-66.249.255.255
74.125.0.0-74.125.255.255
one per line, both in the White or Black Lists.

3 Audiences Audiences – Creating a Black/White List (ID Type)

To create a **White List**, specify the following:

1. **Audience Name** – For example: *White List - offer name.*
2. – In the dropdown, select **WHITE LIST**.
3. Add the list of site IDs, one per line.

AUDIENCE WHITE LIST - OFFER NAME



Name: White list - offer name

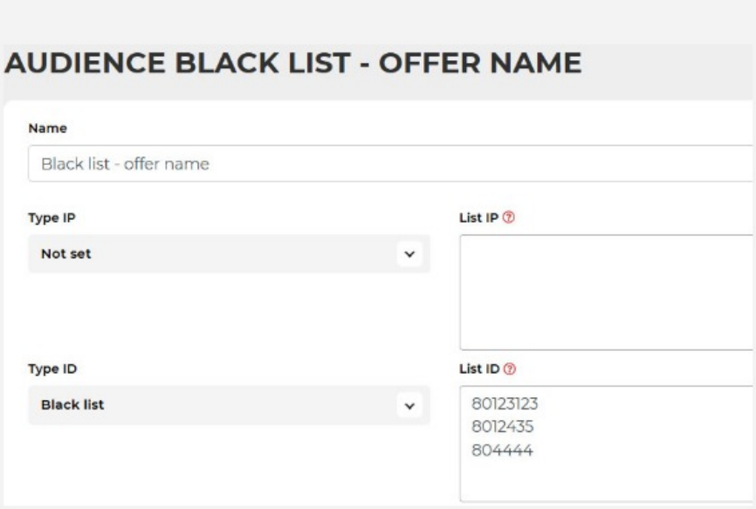
Type IP: Not set

List IP

Type ID: White list

List ID:
80123123
8012435
804444

AUDIENCE BLACK LIST - OFFER NAME



Name: Black list - offer name

Type IP: Not set

List IP

Type ID: Black list

List ID:
80123123
8012435
804444

To create a **Black List**, specify the following:

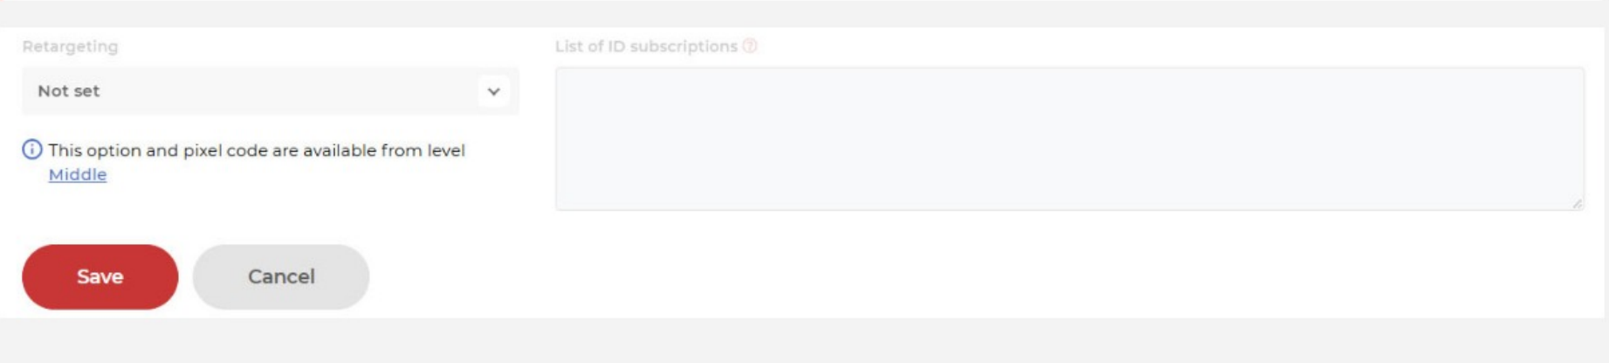
1. **Audience Name** – For example: *Black List - offer name.*
2. **ID Type** – In the dropdown, select **BLACK LIST**.
3. Add the list of site IDs, one per line.

3 Audiences Retargeting

Retargeting

If you want to target a specific audience, such as users who have performed a target action (conversion), specify the subscription IDs. These IDs will be added to the statistics using the macro {pdpid}. Specify each ID one per line.

IMPORTANT!
Retargeting and Pixel Code are available starting from the Middle level.



Retargeting: Not set

This option and pixel code are available from level Middle

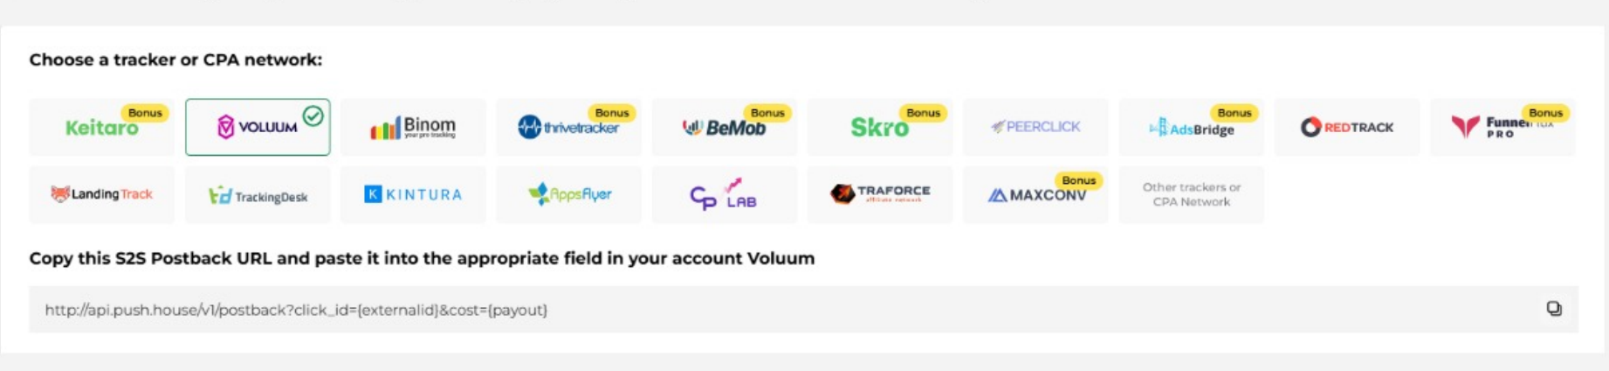
List of ID subscriptions

Save Cancel

4 Tracking Postback

Setting up postback in Push.House involves the following steps:

1. In your Push.House dashboard, go to the Tracking section, select your tracker from the list, and generate a unique URL to send conversion data.
2. Copy the URL and paste it into the corresponding section in your tracker settings.
3. Make sure everything is working correctly by using a test conversion that will appear in the statistics.



Choose a tracker or CPA network:

Copy this S2S Postback URL and paste it into the appropriate field in your account Voluum

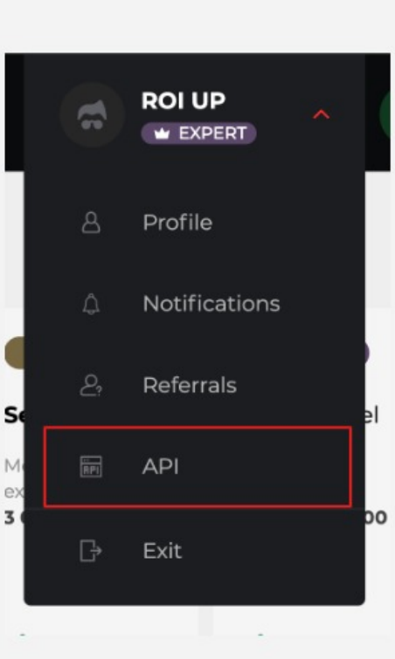
http://api.push.house/v1/postback?click_id={externalid}&cost={payout}

4 Tracking API

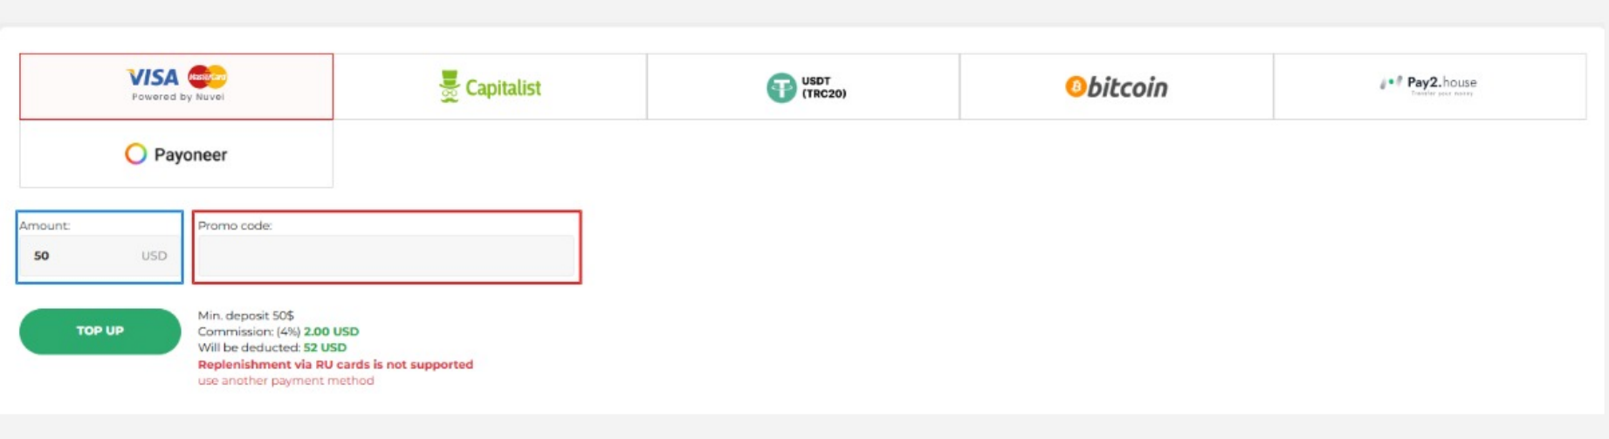
With the API, Push.House advertisers can not only fully automate their advertising account management but also:

- Manage campaigns
- Work with audiences
- Manage groups
- Receive statistics

With the API, launching and controlling your advertising campaigns will become more convenient and effective. Don't miss the opportunity to optimize and enhance your experience with our ad network.



5 Finance



Amount: 50 USD

Promo code:

Min. deposit 50$
Commission: (4%) 2.00 USD
Will be deducted: 52 USD
Replenishment via RU cards is not supported
use another payment method

Minimum Deposit – $50

When depositing USDT (TRC20) with an amount of $6000 or more, you will receive a bonus. The bonus cannot be combined with other promotions.

IMPORTANT!
Some deposit methods may include a fee. Please take this into account when topping up your balance.

Promo Code

After making a deposit, you can apply a promo code, if you have one. Promo codes can be received from our Telegram chat bot or your account manager.

IMPORTANT!
Any promo code can be used only once!
